

CORRUPTION IN SYRIA: LESSONS LEARNED

A STATEMENT BY **YAHIA AL ARIDI**

I propose drafting an article for the next constitution of the future Syria and enacting a law that regulates the enforcement of this article. The essence of the article is early social education that manifests values, ethics and principles of integrity, transparency and democracy. And the formation of an anti-corruption and accountability commission composed of jurists and supported by transparent and credible media whose authority derives from the constitution.
